

Brianna is the daughter of Scott and Shani McBride of Severance, CO. She is a 13-year member of Severance 4-H club involved in Dairy Cattle, scrapbooking, vet science and dog to name a few. She is a senior at Windsor High School and was involved in numerous activities such as FFA, Biology Club, Track and field, National Honor Society, FBLA and held such offices as FFA Reporter, President, Vice President, and 4-H Secretary. She is planning to attend Iowa State University studying food science.

**Brianna McBride** She, at first, wanted to become a veterinarian then decided that wasn't for her. Through tours of different universities, it was recommended that she should consider food science which covers a broad range of careers focused on food from farm to table. She does want to stay on the agricultural side.

Through 4-H, she has shown dairy cattle for the past 10 years and can't imagine separating from the industry. She can see herself in apposition that encourages consumers to purchase dairy products because of their nutritional value and health benefits. At the same time, she wants to assist in creating products the public wants. Through food science Brianna can help consumers become confident in their choices as well as assist producers in creating and selling a profitable product.

For Brianna, the cattle stem her love and passion for 4-H and the agriculture industry, but it is still essential to explore other areas, so she tried the dog project with the leashes, treats, treat holders, rally and obedience. These were far from the halters, feed, pitchforks, breed and showmanship that she was used to with showing dairy cattle. Every 4-H event is now labeled as "my last" and stimulates periods of reflection on all that this organization has provided to her. She looks back at her previous record books and scroll through pictures of when she was only 8 with bangs, crooked teeth and her little calf, Camron. The record books and pictures remind Brianna of the new struggles of each year as well as the unforgettable times of happiness.

Brianna owes all of those experiences and opportunities to her family and 4-H club. Without them, she would not spend days in the barn practicing with each heifer or know how to speak professionally in front of a crowd. Looking back at the last 13 years in 4-H, Brianna would not trade a single moment for the world.

The organization taught her to step outside of the boundaries, work extremely hard, serve others and, most of all, have fun. The lifelong friends extraordinary experiences, and lessons learned are all a part of who she is. Thanks to 4-H, Brianna feels confident in her own skin wherever she goes and is ready to take on the world.

Brianna McBride is the recipient of the Paul & Jean Hoshiko Family Memorial 4-H Scholarship.
